INDEX

A

Acid phosphatase in Arbacia eggs, 1.
Acropora, modifications of by commensal crab, 56.
Action spectrum for spawning of Ciona, 222.
Activity of corpora allata in larval Thermobia, 277.
Adaptation to darkness of goldfish, 200.
to different salinities by Nereis, 362.
Adaptive nature of migration rhythm in Hantzschia, 44.
Adipohemocyte counts in Galleria, 211.
Aedes, repeatedly mated female, seminal loss in, 404.
spermatocysts in, 23.
ALBARRACIN, C. See F. D. BARBIERI, 209.
Ambient temperature changes, responses of bats to, 320.
water oxygen content, in relation to respiratory stress in sea urchins, 16.
Ambystoma, water economy of, 126.
Amino acids, uptake of by starfish tissues, 161.
as excretion products of tropical sea urchin, 34.
Ammonia excretion by tropical sea urchin, 34.
Amount of cytoplasmic DNA in sea urchin egg, 68.
Amphibian, water economy of, 126.
development, amylase and glycogenolysis in, 299.
Amylase in amphibian development, 299.
Anatomy of genital segments of Spirorbis, 91.
of holothurian digestive system, 337.
of Nereis nephridium, 362.
of Paramonostomum, 133.
of Uniserialis, 266.
Annelid, endoskeletal cartilage in, 244.
genital segments of, 91.
morphology of nephridia of, 362.
Antheraea, cholinesterase in brain of, 108.
Arbacia eggs, distribution of enzymes in, 1.
Area of brine shrimp embryos, relation of to respiration, 156.
Artemia embryos, respiration during hatching of, 156.
Arthropod, cardioregulation in, 381, 392.
Ascidian, effect of light on spawning of, 222, 292.
genetic and developmental studies on, 229.
Assay of carotenoid pigments of Dictyostelium, 413.
Association-formation between photic and geophysical stimulus patterns, 311.
Asterias, utilization of dissolved exogenous nutrients by, 161.
Axons, vesiculated, in haemal vessels of holothurian, 329.

B

BARBIERI, F. D., J. S. RAISMAN AND C. ALBARRACIN. Amylase and glycogenolysis in amphibian development, 299.
Bats, responses of to changes in ambient temperature, 320.
Behavior, feeding, of commensal crab, 56.
of repeatedly mated female Aedes, 404.
Benthic microflora, persistent migration rhythms in, 44.
Bird parasite, morphology and taxonomy of, 266.
BLACK, R. E. See C. JACKSON, 1.
Body temperature of bats, in relation to ambient temperatures, 320.
Botryllus, genetic and developmental studies on, 229.
Brain of silkmoth, cholinesterase in, 108.
BRANDT, C. L. See C. C. LAMBERT, 222.
Brine shrimp embryos, respiration during hatching of, 156.
Bromlysergic acid diethylamide, effect of on Limulus heartbeat, 392.
BROWN, F. A., JR., AND Y. H. PARK. Association-formation between photic and subtle geophysical stimulus patterns—a new biological concept, 311.
Bufo, amylase and glycogenolysis during development of, 299.
Bursa fabricius, parasite of, 266.

C

Carrasius, retinomotor rhythms in, 200.
Carbohydrases of holothurian gut, 354.

Carbohydrate metabolism of amphibian embryos, 299.
Cardioregulation in Limulus, 381, 392.
Carotenoid pigments in Dictyostelium, 413.
Cartilage, endoskeletal, in polychaete, 244.
Cecropia silkmoth, cholinesterase in brain of, 108.
Cellular slime mold, carotenoid pigments in, 413.
Changes in ambient temperature, responses of bats to, 320.
in hemocyte picture of Galleria, 211.
Chemistry of marine polychaete cartilage, 244.
Chick embryo, induction of immunological tolerance in, 38.
Cholinesterase in brain of Cecropia silkmoth, 108.
Chromophore, role of in spawning of Ciona, 222.
of Dictyostelium carotenoid pigment, 413.
Chromosome number in Botryllus, 229.
Ciona, effect of light on spawning of, 222, 292.
Circadian rhythm in goldfish, 200.
Circularity of cytoplasmic DNA in sea urchin eggs, 68.
CLARKE, B. J. See A. M. MUN, 38.
Coelomic oxygen tensions in sea urchins, 16.
Cold, responses of temperate-region bats to, 320.
Colonial corals, modifications of by commensal crabs, 56.
Colony fusion in Botryllus, 229.
Color changes in Dictyostelium, 413.
Commensal crab, effects of on host, 56.
Cones of goldfish retina, rhythms in behavior of, 200.
Control of sex characteristics in Rivulus, 174.
Copulation, effect of on number of spermatocysts in Aedes, 23.
Copulatory bursa of repeatedly mated female Aedes, 404.
Coral host of commensal crab, modifications of, 56.
Corpora allata of Thermobia, growth and activity of, 277.
Crab, commensal, effects of on host, 56.
CRITTENDEN, L. B. See A. M. MUN, 38.
Cucumaria, digestive system of, 337, 354.
haemal vessels, vesiculated axons in, 329.
Culture methods for Botryllus, 229.
Cyclic activity in goldfish retina, 200.
Cysts of Artemia, respiration during hatching of, 156.
Cytochrome *c*, possible role of in spawning of Ciona, 222.
Cytology of gametogenesis in Spirorbis, 91.
Cytoplasmic DNA in sea urchin eggs, 68.
Cytoplasmic volume of corpora allata cells in Thermobia, 277.

D

DNA, cytoplasmic, in sea urchin eggs, 68.
DANFORTH, C. G. Northern Pacific Gigantione (Isopoda), 147.
Darkness, effect of on retinomotor rhythms in goldfish, 200.
role of in migration rhythm of Hantzschia, 44.
in spawning of Ciona, 222, 292.
DAVIS, W. H., AND O. B. REITE. Responses of bats from temperate regions to changes in ambient temperature, 320.
Desmognathus, water economy of, 126.
Developing Artemia, relation of surface area to respiration of, 156.
chick, induction of immunological tolerance in, 38.
Development of amphibians, amylase and glycogenolysis in, 299.
of Nassarius, relation of temperature to, 253.
Developmental stage of Dictyostelium, as correlated with pigment, 413.
studies on Botryllus, 229.
Diadema, nitrogenous excretion in, 34.
Diapause of silkmoth, cholinesterase in brain during, 108.
Diatom, diurnal migration rhythm in, 44.
Dictyostelium, carotenoid pigments in, 413.
Differential hemocyte counts in Galleria, 211.
Digenetic fluke Paramonostomum, anatomy of, 133.
trematode, morphology, life-history and systematics of, 266.
Digestive enzymes of holothurian gut, 354.
Digestive system of holothurian, 337.
Diphenylamine, effect of on Dictyostelium pigments, 413.
Dissolved nutrients, utilization of by starfish, 161.
Distribution of absorbed exogenous nutrients in starfish tissues, 161.
of digestive enzymes in holothurian gut, 354.
of enzymes in Arbacia egg, 1.
Diurnal rhythm in Hantzschia, 44.
Domecia, studies of with relation to feeding behavior and modifications of host, 56.
DOYLE, W. L. Vesiculated axons in haemal vessels of an holothurian, Cucumaria, 329.
Dugesia, orientation of, 311.

E

Echinoderm, oxygen uptake and respiratory stress in, 16.
tropical, nitrogenous excretion in, 34.

eggs, cytoplasmic DNA in, 68.
distribution of enzymes in, 1.
gut, histochemistry of, 354.
haemal vessels, vesiculated axons in, 329.
Echinoderms, utilization of dissolved exogenous nutrients by, 161.
Ecology of Hantzschia, 44.
of Nereis, in relation to morphology of nephridia, 362.
of sea urchins, in relation to respiratory stress, 16.
Effect of light on spawning of ascidians, 222, 292.
Eggs, Arbacia, distribution of enzymes in, 1.
Bufo, glycogenolysis in, 299.
Rivulus, production of primary male gonochorists from, 174.
sea urchin, cytoplasmic DNA in, 68.
EICHENBAUM, D. M. See D. G. SHAPPIRIO, 108.
Electrocardiograms of bats, 320.
Electron microscopy of Cucumaria vesiculated axons, 329.
Electrophysiology of Limulus heart, 381, 392.
Embryo, chick, induction of immunological tolerance in, 38.
Embryology of Botryllus, 229.
Embryonic development, glycogenolysis during, 299.
Embryos of brine shrimp, respiration during hatching of, 156.
Emergence of Artemia embryos, respiration during, 156.
EMERSON, D. N. Surface area respiration during the hatching of encysted embryos of the brine shrimp, Artemia, 156.
Encysted brine shrimp, respiration during hatching of, 156.
Endocrine activity in larval Thermobia, 277.
Endopeptidase in holothurian gut, 354.
Endoskeletal cartilage in polychaete, 244.
Environmentally controlled induction of male gonochorist fish, 174.
Enzyme secretion sites in holothurian gut, 354.
in silkmoth brain, 108.
Enzymes, amphibian, during development, 299.
digestive, of holothurian gut, 354.
hydrolytic, distribution of in Arbacia eggs, 1.
Epicarid crab, new species of, 147.
Epidermal absorption of exogenous nutrients by starfish, 161.
Eptesicus, low-temperature responses of, 320.
Esterase in Arbacia eggs, 1.
in holothurian gut, 354.
Eudistylia, endoskeletal cartilage in, 244.
Exchange of water with soil by salamanders, 126.
Excretion, nitrogenous, in tropical sea urchin, 34.
Exogenous nutrients, utilization of by starfish, 161.

F

Feeding, effect of on seminal retention in female Aedes, 404.
habits of Domecia, 56.
Female Aedes, repeatedly mated, seminal loss in, 404.
genital segments of Spirorbis, 91.
FERGUSON, J. C. Utilization of dissolved exogenous nutrients by the starfishes Asterias and Henricia, 161.
Fertilization of Botryllus eggs in vitro, 229.
Fine structure of Cucumaria, 329.
Firebrat, larval, growth and activity of corpora allata in, 277.
Fish, retinomotor rhythms in, 200.
self-fertilizing hermaphroditic, production of primary male gonochorists by, 174.
FISH, J. D. The digestive system of the holothurian, Cucumaria, 337, 354.
Food, role of in activity of corpora allata in Thermobia, 277.
of Botryllus, 229.

G

GABA, effect of on Limulus heartbeat, 381.
Galleria, changes in hemocyte picture of, 211.
Gamete release by Botryllus, 229.
by ascidians, effect of light on, 222, 292.
Gametogenesis in Spirorbis, 91.
Gastropod larval development, relation of temperature to, 253.
Genetic studies on Botryllus, 229.
Genital segments of Spirorbis, 91.
union in repeatedly mated female Aedes, 404.
Geographic orientation of planarians under experimental conditions, 311.
Geophysical forces and photic stimulus patterns, association-formation between, 311.
Gigantione, new species of, 147.
Glucose, exogenous, uptake of by starfish tissues, 161.
Glycogenolysis in amphibian development, 299.
Goldfish, retinomotor rhythms in, 200.
Gonads of Spirorbis, 91.
Gonochorists, primary male, environmentally controlled induction of, in Rivulus, 174.
Grafts, intracoelomic, induction of immunological tolerance by in chick embryo, 38.
GREGG, J. H. See S. O. STAPLES, 413.
Growth of corpora allata in larval Thermobia, 277.

rate of Nassarius larvae at different temperatures, 253.
Gut of holothurian, structure of, 337.

H

Hantzschia, diurnal migration rhythm in, 44.
HARRINGTON, R. W., JR. Environmentally controlled induction of primary male gonochorists from eggs of the self-fertilizing hermaphroditic fish, Rivulus, 174.
Hatching of brine shrimp, surface area respiration during, 156.
Heartbeat, regulation of in Limulus, 381, 392.
of bats, in relation to ambient temperature, 320.
Hemal system of holothurian, structure of, 329.
Hemocyte changes in Galleria, 211.
Henricia, utilization of dissolved exogenous nutrients by, 161.
Hermaphroditic fish, production of primary male gonochorists by, 174.
Hibernating bats, responses of to changes in temperature, 320.
Histochemistry of holothurian gut, 354.
of silkmoth brain, 108.
Histology of Spirorbis genital segments, 91.
of larval Thermobia, 277.
of marine polychaete, 244.
of Nereis nephridia, 362.
Holothurian, digestive system of, 337, 354.
hemal vessels, vesiculated axons in, 329.
Hormonal activity in larval Thermobia, 277.
Horseshoe crab, cardioregulation in, 381, 392.
Host of commensal crab, modifications of, 56.
Hyalophora, cholinesterase in brain of, 108.
Hydration, role of in excystment of Artemia embryos, 156.
Hydrolytic enzymes, subcellular distribution of in Arbacia eggs, 1.
5-Hydroxytryptamine, inhibition of cardioregulation in Limulus heart by, 392.

I

Immunological tolerance in chick embryo, 38.
Induction of immunological tolerance in chick embryo, 38.
by light of gamete-shedding in ascidians, 222, 292.
Inhibition of Limulus heartbeat, 381, 392.
Insemination of repeatedly mated Aedes, 404.
Intersexuality in fish, 174.
Intracoelomic grafts, induction of immunological tolerance by, in chick, 38.
Invertase of holothurian gut, 354.
Iodine reactions of Bufo egg glycogen, 299.
Isopod, new species of, from northern Pacific, 147.

J

JACKSON, C., AND R. E. BLACK. The subcellular distributions of some hydrolytic enzymes in unfertilized eggs of the sea urchin, Arbacia, 1.
JOHANSEN, K., AND R. L. VADAS. Oxygen uptake and responses to respiratory stress in sea urchins, 16.

Life-duration of Rivulus in the laboratory, 174.
Life-history of Uniserialis, 266.
Light, effect of on retinomotor rhythms in goldfish, 200.
role of in migration rhythm of Hantzschia, 44.
in orientation of planarians, 311.
Light-induction of gamete-shedding in ascidians, 222, 292.
Limulus, cardioregulation in, 381, 392.
Lipase of holothurian gut, 354.
LOCKE, B. R. See D. G. SHAPPIRIO, 108.
Loss of semen in repeatedly mated Aedes, 404.
Low temperature, effect of on sex-determination in Rivulus, 174.
responses of bats, 320.
Lunar influence on orientation of planarians, 311.
Lytechinus eggs, cytoplasmic DNA in, 68.

M

Magnetic fields, role of in orientation of planarians, 311.

Male genital segments of Spirorbis, 91.
gonochorists, environmentally controlled induction of, in Rivulus, 174.
Maltase in holothurian gut, 354.
Marine polychaete, endoskeletal cartilage in, 244.
MATHEWS, M. B. See P. PERSON, 244.
Mating, effect of on number of spermatocysts in Aedes, 23.
of female Aedes, effect of on seminal retention, 404.
Maturation of sperm in Aedes, 23.
Metabolism of hatching brine shrimp, 156.
of sea urchins, in relation to their ecology, 16.
Metamorphosis of silkmoth, cholinesterase in brain during, 108.
Microflora, benthic, migration rhythms in, 44.
Migration rhythms in Hantzschia, 44.
MILKMAN, R. Genetic and developmental studies on Botryllus, 229.
Mitochondrial DNA in sea urchin eggs, 68.
Modifications of coral host by commensal crab, 56.
Moisture tension, role of in water economy of salamander, 126.
Molecular structure of Dictyostelium carotenoids, 413.
Molgula, light-induction of gamete shedding in, 292.
Mollusc, relation of temperature to larval development of, 253.
Molting of Thermobia, role of corpora allata in, 277.
Monochromatic light, effect of on spawning of Ciona, 222.
Morphogenesis of frog, glycogenolysis in, 299.
Morphology of genital segments of Spirorbis, 91.
of Gigantione, 147.
of holothurian digestive system, 337.
of Nereis nephridia, 362.
of Paramonostomum, 133.
of Uniserialis, 266.
Mosquito, repeatedly mated female, seminal loss in, 404.
spermatocysts in, 23.
Moth, wax, changes in hemocyte picture of, 211.
Mouthparts of commensal crab, 56.
Mudsnail, relation of temperature to larval development of, 253.
Multiple insemination of Aedes, 404.
MUN, A. M., L. B. CRITTENDEN AND B. J. CLARKE. Induction of immunological tolerance by intracoelomic grafts in the 4-day chick embryo, 38.
Myotis, temperature responses of, 320.

N

Nassarius, relation of temperature to larval development of, 253.
Nephridia of Nereis, morphology of, 362.
Nereis, morphology of nephridia of, 362.
Neurogenic heartbeat of Limulus, 381, 392.
Neurophysiology of Cecropia brain during diapause, 108.
Neurosecretory action in silkmoth brain, relation of cholinesterase to, 108.
in holothurian, possible evidence for, 329.
New species of Gigantione, 147.
of Uniserialis, 266.
Nitrogenous excretion in tropical sea urchin, 34.
Northern Pacific Gigantione, 147.
Nucleic acid distribution in Arbacia egg, 1.
of sea urchin egg mitochondria, 68.
Numbers of spermatocysts in Aedes at various stages, 23.
Nutrients, dissolved exogenous, utilization of by starfish, 161.
Nutrition, role of in activity of corpora allata in larval Thermobia, 277.

O

Oenocytoid counts in Galleria, 211.
Oogenesis in Spirorbis, 91.
Osmotic relations in Nereis, 362.
Osteoid tissue in marine polychaete, 244.
Ova, sea urchin, cytoplasmic DNA in, 68.
Oxygen consumption of hatching brine shrimp, 156.
of sea urchins, 16.

P

Pacific, new species of Gigantione from, 147.
PALMER, J. D., AND F. E. ROUND. Persistent, vertical-migration rhythms in benthic microflora. VI, 44.
Paramonostomum, anatomy of, 133.
